JULY 11th(12:07pm)
1.Welcome to the project phase, use an actual profile picture, include your task in your bio and join #stage-zero, #technical-help, #random

JULY 12th(2:43pm)
2.During the live sessions, note that we would always take a poll and a side note. Unlike before, if you miss a live class, you can rewatch it, but for project phase, no live streaming

3.You will get a calendar for the project phase

JULY 12th (6:49pm)
@channel, there are 143videos. You should get answers to most of your questions there
Share your videos with friends, family and the world here
https://youtube.com/playlist?list=PLxuUHF3OiqfXCoSTDlgqIp3MAiWWejo3X

JULY 13th(8:47pm)
Hi, Team @channel we are excited to have you here. Pls subscribe to the project phase calendar
https://calendar.google.com/calendar/u/0?cid=MWI1OTBwOGNpdW5sNmZya3NydThwbG01MmtAZ3JvdXAuY2FsZW5kYXIuZ29vZ2xlLmNvbQ

8:53pm
Pls note that the same rule applies here and is even stricter, no external links

In preparation for Saturday, please post your questions here @channel

9:51pm
Please note that all classes/meetings will be recorded. However, these recordings will not be available until the end of August 2022. Please attend each meeting with attention and the intention to take notes. @channel

10:06pm
The above is important and also part of the learning process. Meetings with stakeholders are not usually recorded, you just learn to listen, critically think, ask the right questions and take notes. @channel

JULY 15th(8:10pm)
Hi, as a reminder, our first meeting is tomorrow. :slightly_smiling_face: Please bring all your questions. @channel, if you wish to leave the project phase, today is the last day to decide. Please send a DM to @coordinator

JULY 16th(9:55am)

@channel when we said no external links will be permitted we meant it, you flout that rule you are out. Things you might have done in the training phase and we overlooked, you do it here, you are out.

12:14pm
@channel This is the link to the Git-Hub videos.

https://youtube.com/playlist?list=PLxuUHF3OiqfVlhMh2XaA7gx_NaavKM7C9

JULY 18th(10:09)
@channel some information regarding your upcoming project topics:

1.Your projects have both public website, documentation (developer and public how-tos), and the platform.

2. You cannot have a single paged website for your public website

3. You cannot have any payment integrations - none of your projects should require payments of any kind.

4. You must not create company account, social media accounts and other such accounts

5. You are allowed to use libraries, frameworks and third-party platforms for a small part of your projects - however, you can't just "consume" an already existing platform that does something your project already does.

6. Do not buy a domain name for your project

7. Do not use your own personal servers, you will be provided a server

8. Do not use your personal repositories, you will be provided with a repository to use.

9. Once you get your grouping today, the first thing to do is to quickly meet and select your team leads, discuss each other's strengths, and be ready for your topic.

10. We are inviting more people to this workspace throughout the week, we will try to avoid adding people to already created groups - but if that happens, you have to carry them along and get them engaged too.

11. Remember, we don't expect individuals to reach out to supervisors. We expect the team to meet, agree and the team lead reach out to supervisors.

12. Supervisors will give you their schedule of availability. It is your responsibility to attend the meetings they set up and ask all your questions there.

11:48am
We are setting up project groups. You will be invited to 2 private channels - 1. your project channel and 2. your team channel. @channel your project channel is to interact with your supervisor and other teams working on similar project. Your team channel is to interact with your team members.
https://i4gxzuriprojectphase.slack.com/files/U03MXHM1R46/F03QKMUE2FJ/screenshot_2022-07-18_at_11.48.03_am.png

11:56AM
@channel once you join your project channel, you should first go to the description and click the link there.

12:37PM

@channel remember attending classes is a must to stay in the project phase

7:54PM
@here you all were glad when you got the invite mail, maybe because of the euphoria of the moment you didn't read the details of the email and understand it in its entirety, so you agreed to the terms and conditions, now day one of the project phase you are complaining of us not being considerate, we didn't mandate you to accept the invitation, you did out of your choice, maybe you should go back to that mail and this time read it and actually understand the details then ask yourself and answer truthfully, "can I do this" if your answer is NO kindly just send me your student ID and continue with the training phase. Don't start and ghost halfway, that will cost you a lot :heart:

JULY 19th(11:59AM)
@channel if you just joining us, start reading the announcement channel, start from the first day and understand all the details. Welcome to Project Phase

JULY 20th(8:12AM)
@channel Top of the morning to you. A few things to take note of
 You would be added to your project channel today, in your project channel you will find a link to your project in the channel's description, you are advised to use 3-4 hours to first understand the project before you start asking questions.
 You would also be added to your team channel, this is where you have your interactions, once you are there, have a discussion on your project, brainstorm on it and pick a team lead.
 On your calendar, we will upload the office hours of your supervisors. Note that your supervisor will always meet with you as their project students and not as a team, however, they will provide slack support for you on your project channels.

We encourage that you reserve your Project Channel for technical help and questions instead of bants.
We may make huddle available in the project channels but only your supervisor can start an huddle.
In your team you would have a majority of Fullstack and Design participants, some teams have a sprinkle of Php, NodeJs, Frontend and Python participants in them, so you would have to work with what you have.
Remember that you are not permitted to ghost your team, once we verify a case of you disappearing, you would be excused from here.
Mutual respect is highly encouraged in your channels, remember that @coordinator sees all.

May the forces be with you

4:39PM
You will be added to 2 private channels, the first channel is your project channel - which means everybody in that channel will be doing the same project. the second channel is your team channel, which means everybody in that team will be working together.
@channel Please read all previous channel announcements.

4:55PM
@channel Please do not edit project document, you can make a copy for your team and edit that copy. Remember, about 10 teams are working on the same project, do not edit the general documentation.

If you find yourself in multiple teams, there's nothing to worry about. It will be sorted. There will be a time to report that. @channel

Do not wait, start interacting in your teams @channel your first presentation is next week.

@channel Please avoid "hello", "i'm new here" etc in the project channels. You can do that in your team channel. Please read other announcements.

6:34PM
@here you realize you are working on project as a team that means your first set of questions should happen in your team channels and not in the project channel

6:51PM
@here
Proj_team_1 is an example of team channel

proj_my_debtors is an example of project channel

Project channel is your faculty, team channel is your department according to @Emmanuel Oluwasogo FullTrack WebDev Fulltime

7:24PM
@channel, please invite @coordinator and I to your team channels if we are not there

8:36PM
Things you should have done by now: @channel

1.Identify your team channel, and project channel
2. Make a copy of your project document
3. Interact with your team, introduce yourself get to meet yourselves.
4. Vote / Select / Appoint a team lead and assistant.
5. Read the project document thoroughly, and share your ideas in your team channel - start doing your research.
6. Agree on a voice / video / huddle meeting time / date with your team. The meeting should be to really set things in motion.

By tomorrow, we'll be asking for the names of your team leads so we can add them to the GitHub organisation and they can invite you.
@channel there is frankly no time to waste, and since we have limited resources, any team channel that becomes in-active for 24hrs+ will be deactivated and all team members removed from project phase - we want to allocate resources appropriately.

Your supervisors will be appointed tomorrow, and their meeting days/times will be published on the calendar.

Your first presentation is in one week - the purpose of the first presentation is to show us that you understand the project.
1.We want to see your document (not just the one we gave you, but an extended one)
2. We want to see your team members on GitHub
3. We want to see your GitHub project set up with tasks
4. We want to see your Figma board and some sketches
5. We want to see your code/database schema and sketches.

The more of the above you share with us, the better for your team.

https://i4gxzuriprojectphase.slack.com/archives/C03N4445HBM/p1658345978825729
There are at least 20 people in each team - if the team channel is inactive for over 24 hours - it means not 1 person said anything in the channel for 24 hours+.
@channel there is frankly no time to waste and since we have limited resources, any team channel that becomes inactive for 24hrs will be deactivated and all team members removed from project phase. We want to allocate resources appropriately

I'll also be sharing some useful ideas that others are applying in their team - you might want to do the same. For example:

1.One team has asked all members to change "What I do" on their slack profile to their tracks - that way it's easier to identify people

2. Another team has asked the team members to share links of platforms that already do what they are to build or something similar. That way they can learn from those already established platforms.

3. Another team has asked all members to use actual photos in their profile - it makes team bonding easier.

4. Another team decided to create a google docs to put important information. This is a very good idea because this workspace is on Slack's free account - which means old messages will start disappearing soon. @channel I recommend you all do this in your team, create a document (pending addition to GitHub) and start putting ideas plus important conclusions in that document.

9:47PM
@channel if you were added to multiple teams, here is the thread to fill:
https://i4gxzuriprojectphase.slack.com/archives/C03N4445HBM/p1658339378520319

10:03PM
Please remember, as Seyi said, you are working in teams. Designers - you are not trying to prove your ability to make frontend developers cry, frontend - you are not trying to show designers you know your stuff, and backend - you can't just wait until design, and frontend is done before you start working. @channel

Some more tips from other teams @channel

1.One team has decided to keep the team channel clean by using thread for all conversations - this could he helpful in keeping things organized.

2. Another team has asked that all team members add their WhatsApp phone number to their Slack profile - although, due to the fact that this is workspace contains almost three thousand people, if you are not comfortable displaying your main WhatsApp line, you could display an alternative one. The team decided to do this so it's easier to reach everyone.

(Please note, these are tips from other teams - it is not a requirement.)

JULY 21ST(10:35AM)
Good morning all @channel Update for you all:

1.If you have not been grouped, we apologize; we'll undoubtedly group you today.

2. If you are in multiple teams, interact with both teams while we sort out the issue - the issue will definitely be resolved today. If you have not responded to the thread, you can do that now. Here is the thread
https://i4gxzuriprojectphase.slack.com/archives/C03N4445HBM/p1658339378520319

3. You'll be asked to submit the names of your team lead and assistants today (3 PM WAT). The team leads will also be required to submit their GitHub username so they can be invited to the organisation.

10:43AM
@here if you are in a team and you haven't been added to a project channel, just tell your team members to invite to the project channel

11:01AM
4. Don't wait until you figure everything out before you start working. Take each day to achieve things towards your final project.

@channel, unfortunately, we are unable to provide a zoom link for your individual team meetings. Please use Google meet instead - you should record important notes in Google docs as recommended yesterday.

11:27AM
For those working on the favicon_gen (and everyone else), your interaction should be in your team channels. Not the project channel. @here

3:13PM
@channel this form is for only team leads, team leads should fill this form. Response to the form ends by 4:30pm(WAT). I Repeat only team leads should fill the form, if there are multiple response from a team or you don't fill the form before it closes you will be penalized.
Fill Form
https://i4gxzuriprojectphase.slack.com/archives/C03N4445HBM/p1658396283355189
You'll be asked to submit the names of your team leads and assistants today(3PM WAT). The team leads will be required to submit their GitHub username so they can be invited to the organization

8:37PM
@channel important information regarding your first presentation:
1.Your first presentation will no longer be a live event
2. It will be a 5-7 minutes recording
3. Your recording will be submitted to a Google drive that will be provided for you
4. Your recording should be clear - you don't need to. do any fancy editing, it just needs to be clear video and voice.
5. There are 129 teams, which means mentors will be reviewing 129 submissions. Please, go straight to the point. Anything over 7minutes will not be graded, so it is better to avoid getting to 7minutes.
6. However, anything below 5 minutes will lose you points, so don't do less than 5 minutes.

7. After uploading your recording, you'll be getting a form to enter certain information including individual contribution of each team member.

8. You'll also be required to submit supporting materials such as documentation, figma board, github project etc.

9. You can use slides in your submission (this is not required, but highly recommended), if you use slides, please make sure you also submit the slides.

10. Deadline for first presentation submission will be announced on Saturday. This is to pre-inform you, so there are no surprises.

"How will teams get presentation scores and feedback?" - Scores will be announced on this channel @channel

Your supervisor will give you your feedback

10:03PM
One hint from a team, the team has dedicate 2 members to review all posts on this channel. That way they will not miss any important information. @channel I recommend you do the same in all your teams. There will be several announcements, you have to keep on the look out.

JULY 22(6:08AM)

@channel Good morning everyone, Your supervisors:
1.wiki_auth: @SnrAndy
2. my_cms: @Loy
3. price_comp: @UduakE
4. my_debtors - @Davidblack
5. chunk_file: @nwokoyepraise
6. qr_gen: @caculuz
7. favicon_gen: @sylvercodez(hons)
8. t_c_gen: @Victoria Enebeli
9. fetch_metadata: @ToluFolorunso
10. anima_lib: @Tobe
11. excel_comp: @SammyBloom
12. col_films: @Phorlajormey. fig
More information will come on other mentors available for general consultation later.

6:55AM
@channel please invite your supervisor to your project channel - NOT YOUR TEAM CHANNEL. Your project channel is the one with proj-{name}.

7:03AM

@channel your server will be provided next week. There will be 2 servers for all teams. You have to ensure you create your block properly and not do things that will interfere with other teams. You'll get some lessons on basic setup.

8:26AM
@channel if you just got your teams, get straight to work, don't delay.
Also I saw some teams using telegram and all, you do understand you are breaking a rule right? Your conversations should happen in your team channels. If we wanted you to use telegram and all, we would have told you.

@channel for newly created teams, get your team lead and assistant ready, alongside Github Username of the team lead, I will be opening the form again. Emphasis on newly created teams.

@channel if you are still in two teams as of now reply under this thread with your email address, your preferred team(the team you want to work with) and the second team. Please indicate these things.

11:42AM

Good morning @channel. Please try to follow simple instructions. Sending multiple messages on the double team thread is only causing further problems. I started with earlier messages, if you didn't edit your first message and I removed it from your team of preference, the blame is on you. I asked you to edit your first message with your team of preference only if I didn't react to it. If I reacted to it, then I have already removed you from a team. Sending multiple messages on that thread is not helpful because there is more than one person sorting. Please stop slowing the process down. Thank you for your future cooperation.

@channel for the new teams that have not filled the form, you can do so now. You have until 7:00pm(WAT) to fill the form. Only the team that didn't fill it yesterday.
https://forms.gle/6RFMByM5GQHLHoNFA

JULY 23RD(9:38AM)
@channel for those interested in the algorithm challenge - and personal growth. There will be a daily challenge started in 2 weeks. This is a pre-information, you don't have to take any actions right now.

1:14PM
@here your calendar is now updated. Note that the supervisors will meet with you as a project and not as a team.

JULY 25TH(4:28AM)

@Sammydepoj @eloke @Kanma @Ayoposi You have been invited to a new channel to run some tests. Please run the tests and respond accordingly. You don't have to say anything here; this post is to call your attention to it. @here if they are in your team, please contact them. The tests need to be done ASAP.

JULY 26TH(10:38AM)
@channel good morning. How is your Project going? We announced earlier that your first presentation will be in form of a recorded video, this is an update to the announcement, team leads kindly take note of all these instructions.

For your presentations, you are to note the following:
 1.Your presentation must be recorded.
 2.Your recording must not be more than 7minutes and not less than 5 minutes. Anything different from this will cost you points.
3.You are to create a detailed google sheet showing what each member of the team is doing for the project. Also indicate those who are doing nothing. You will be asked to submit the link to the sheet.
 4.Get the links to your figma board ready. Remember to make sure your links are accessible.
 5.Get the links to your GitHub Ready.
 6.Get your Database Schema link ready.
 7.Get your documentation link ready.
8. Get the links to any other relevant document of your project ready.
Cc @channel

I will be sharing the link to the folder you will be uploading your recorded video and the form you are to fill. Note that you will be able to start submitting your presentations from 12:00noon(WAT) tomorrow (Wednesday) to 6:00pm(WAT) on Saturday.

Cc @channel

12:23PM
@channel please use the proper name for your repositories on GitHub. Remember, at least 10 teams are working on the same project - therefore, it's better to use both team name and project name to name your repository. If you also have a unique name, you need to make it clear what project you are building.
For example, the first one is not acceptable, the second one is better.
https://i4gxzuriprojectphase.slack.com/files/U03MXHM1R46/F03RDAL2SQ1/screenshot_2022-07-26_at_12.23.13_pm.png

12:43PM
@channel For the Presentation, remember that we want to see the presenter(s) face(s). Make sure your video is on.

Tip: Just record using Zoom

28TH JULY(8:14AM)
@channel Top of the day to you all! Trust you are good. Just a general feedback. I have noticed some(Frontend and Full stack) of you complained and even sent a DM that your task score had some marks deducted for some little reasons like: font-weight, or your form card too large etc.

There is something called Pixel-perfect. This means that your design implementation to frontend should be exactly what is in the design, the spacing, typeface, alignment and all. We were a bit lenient, because most of the task had you implement from a JPEG and PNG. Had it been it was a Figma link, perhaps the grading would have been more strict. Though some of you did a very nice job.

As a developer, it is not your work to influence design decision, that is the work of the designer. The only thing you can do is to collaborate with the designer, while he designs, drop some feedback for him, probably if you feel the design might take you too much time to implement, then you both can reach a common ground. IT IS A TEAM WORK.

As you begin to progress in your career, always have this at the back of your mind. A pixel-perfect Implementation of a mockup to code is a skill, that many recruiters out there look out for, during interviews.

Thank you! Do have a nice day

10:17AM
@channel you can now make use of the #technical-help channel to ask project-related questions. We have mentors in there ready to provide help

10:43AM
@channel this is the information for the submission of your presentation, please carefully read and follow the instructions to the fullest (your points depend on it).
 1.Rename your Video file with your team name e.g Team 1_Authwiki
 2.All your Documents and links should be saved in the same format as above
 3.Upload your video to this Google drive folder
https://drive.google.com/folderview?id=1CV_sZCEIZDwfWVspKrI1Eu6bdzdCrRiF
4.After successfully uploading your Presentation, Fill this form as meticulously as possible.https://forms.gle/91ubavnWQ5wtP1dD7

Note: You can open the form and check the questions so you know the things you need to get together before filling out the form.

Your Deadline is still 6:00 pm (WAT) on Saturday.

11:47PM
@here there is a general class for all Developers tomorrow on how to connect backend to frontend, check your calendar for details.

1:53PM
@channel There are 142 people who have refused to accept the GitHub invite. You are stopping others from getting into the GitHub Organisation. If you do not accept the invite by 11 PM today, you'll be removed from the organisation and the workspace. Team leads, check the list, if they are inactive, report them to @coordinator and let's not have people taking up space.

2:07PM
@channel our first workspace purging is starting tomorrow. Any inactive members, please report to @coordinator. It is important you report now so we can be aware, do something to help or change the expectation from your team.

Everybody in the team should be added to GitHub, regardless of track. This is why we told everyone to open GitHub accounts. You'll be using GitHub to allocate tasks. @channel

2:25PM
GitHub project is the recommended project management tool. Hence, all task allocation will happen on GitHub. This has been explained several times. @channel designers will also be responsible for testing and creating GitHub issues for coders to fix. GitHub is not just a coding tool; it is a collaboration tool just like Figma. We will not be going back to explain this again. Please note.

2:54PM
@here for reporting the inactive members, please don't send a DM to say so and so is inactive, I would be coming to your team channels myself. We would find them out and remove them there and there. So don't send me a DM. Thank you

@here there are some team leads who have been sidelining people, I read of a case of a team lead and assistant allocating tasks based on your points on the Zuri board, knowing fully well that part-time participants don't have the same score strength as Full time, I am coming for you.

@here and for those who are inactive and you are thinking your excuse will be that they didn't assign me a task, dead the idea. You can't leave your fate in the hands of people. If they didn't assign you a task what did you do? Did you make them see the value you will bring to the table or you just folded your hands.

9:24PM

@channel, we are contacting GitHub to increase the daily limit; for now, invite as many people as you can request per day.

JULY 28TH(6:04AM)
@channel please do a little research on your teams, and collaborate with your team lead. You might not need to be "invited to the GitHub organisation" before you can contribute to the project.

6:27AM
PS: The point of the post is to take away the excuse of - "I didn't do anything because I was not invited to GitHub."

11:55AM
@channel please do not forget the backend python class by 12

28TH JULY(9:06AM)
@channel Please remember, live classes are required. If you miss a live class, you'll have to wait till later in August to get the recording.

9:30AM
We know it's difficult to get things at a go. But, this is part of the learning process. We'll like everyone to start leaving the mindset of "training" to thorough, attentive listening and note taking. You already know what you don't know; now, you can go ahead and do a personal research to re-learn what the tutor talked about. @channel

In class, you should be taking notes, your note should include things you need to further study on your own, things you need clarity on and things you have already gotten. You cannot be in a class for 2 hours, and then need to watch the entire 2 hours again - that's a wrong mindset. The mindset of "I'll watch it again later" is wrong.

This is how to get the best of this project phase.
Also remember, you have a team - a team of about 20 people, you can start a study group and fill in your missing knowledge gap.
This is how to fully maximize community, not just by showing each other fancy designs.

Finally, we do not need the video; it doesn't earn us more or less money - this is just part of the training. A mindset shift @channel :slightly_smiling_face: Trust the process, and you'll become better for it.

11:50AM
@channel This is a Reminder
The deadline for the submission of your Presentation is 6:00PM (WAT) tomorrow.

The information you need for the submission of your presentation are listed below. Follow the instructions to the fullest (your points depend on it).
1. Rename your Video file with your team name e.g Team 1_Authwiki
2. All your Documents and links should be saved in the same format as above
3.Upload your video to this Google Drive
Folderhttps://drive.google.com/folderview?id=1CV_sZCEIZDwfWVspKrI1Eu6bdzdCrRiF
4.After successfully uploading your Presentation, Fill this form as meticulously as possible.https://forms.gle/91ubavnWQ5wtP1dD7

Note: You can open the form and check the questions so you know the things you need to get together before filling out the form.

Your Deadline is still 6:00 pm (WAT) on Saturday.

11:59AM
@here No team has submitted till now.
Tomorrow you start seeing, we were already uploading it before access was revoked, network is slow, pls give us 5 mins,

okay…👀

12:10PM
I know we said team leads don't carry or enjoy any unique benefits, but please, that still doesn't mean you should disrespect anyone. @channel Respect each other and appreciate the team leads.🙂

2:15PM
Hi @channel... There'll be a continuation of yesterday's class by 8pm today... You're welcome to attend even if you do frontend... Check your calendar for the details.. See you soon🙂🙂

2:38PM
Please do not forget that GitHub is the official project management tool. @channel "I was working, my work was on Figma and Google Docs" this won't be accepted. If you created a Figma design, add the link on GitHub; if you write documentation on a page like Google Docs, put the link on GitHub. Every work done should be tracked through GitHub. GitHub is the central place of truth.

4:54PM
@channel servers will be provided 1 week after the first presentation. If you want to add a testable link to your first presentation, you can use any free servers and domain.

NOTE: You are not allowed to spend any money. Do not buy a domain or pay for servers. Anything you use must either be open source or free to use.

7:36PM
@channel please do not forget our class by 8pm

8PM
@channel, after a careful review, we have decided to reward the top 10 teams based on the first presentation. The top 3 teams will get 50k each. The following five teams will get 10k each. The last 2 teams will get 2.5k each. Here are the conditions attached to the reward:
1.The money will not be sent to the team
2. Each team will have to provide a list containing all the active members and how much they should get
3. This list should always have the team leaders get the highest reward.
4. the list must be agreed and decided by the entire team (active members of the team) - the lead cannot decide how the money will be shared alone
5. Once the list is ready, you'll share it with @coordinator who will process the payment.
6. However, you can agree as a team to send the entire money to the team lead. For example, instead of 20 people sharing 2.5k, you can decide to give it to your team lead.

JULY 30TH(12:02AM)
@channel 1 week since the project phase started. Please give your feedback:
1.Things are going smooth so far
2. Project phase is so much fun
3. I am completely lost, I have no idea what I am doing
4. I don't have a team, please help
5. I hate my team, they are not giving me task
6. I am too busy to fully participate
7. The supervisor and support meeting schedule is so much helpful
8. I don't know my team
9. I don't know my supervisor
10. I am learning more than the entire training phase

11:03AM
@channel There are a few presentation submissions so far; please remember that today is the deadline.

4:32PM
@channel, your GitHub project should be public. The tutors and supervisors are not part of the organisation, and they will be grading all your submissions. So everything must be shared and publicly viewable.

5:45PM
@channel, there are 102 presentation submissions so far. The form is closing in 15 minutes. Eighteen teams have not submitted.

6:04PM
@channel congratulations to the teams that submitted. To the groups that did not submit, unfortunately, this is the end of the project phase for you. We hope you did learn some things during this time and hope you'll apply that in your dealings moving forward. You'll get your training certificate as promised.

122 teams submitted @channel 7 groups did not submit.

6:34PM
The following teams did not submit @channel

Teams: 43, 76, 95, 121, 123, 125 and 129. @channel please say your goodbyes, the teams will be shut down tonight, and deactivation will happen tomorrow.

Teams on the watchlist: (watch list means you either submitted at the knick of time or submitted during the extension)

Teams: 68, 65, 105, 113, 104, 21, 13, 74, 119, 117, 111, 4, 14, 75, 126, 2 and 81. These teams submitted between 17:51 and 18:05. Please avoid cutting it this close next time.

The following teams submitted a day before the deadline; well done! @channel:
Teams: 86, 7, 33, 36, 41, 52, 16, 100, 45 - we are proud of you. This is what we like to see. Please keep it up.

6:56PM
Grading will start tomorrow, and results will be announced on Thursday. @channel, you'll also get feedback from your supervisors. Please don't forget, for the next presentation (the final presentation); we want to see a completed project - completed means you have delivered the features requested in the initial documentation. You can add more features, but we want to see the requested features first. You'll get more information on the submission details later.

7:04PM
@channel please note, that next time when we ask for "team name" we are asking for the name we gave you. Not the name you gave yourself. Teams 39, and 116 submitted, but they used the wrong name. the list has been updated-
https://i4gxzuriprojectphase.slack.com/archives/C03N4445HBM/p1659202956125729

31ST JULY(9:51AM)
@here first day of grading and we are already seeing presentations that is just slides, no audio, no face. Inaccessible Figma links, Inaccessible github repo, no documentation. Okay oo 👀

10:01AM
@channel note that it is possible for a team to be removed from the Project Phase as a result of terrible submission and very low points

10:38AM
How do you submit the notes of your group meeting as documentation.
@here

3:51PM
@channel, these teams were shut down yesterday.https://i4gxzuriprojectphase.slack.com/archives/C03N4445HBM/p1659202956125729 The deactivation of members of the group is happening today. We are discovering some issues in your submissions - you'll be getting feedback. Please take note of the feedback and apply it to your project during the final presentation.

7:05PM
@channel Please report all mistaken deactivations to @coordinator.

9:51PM
@channel this is one of those nights you don't want to sleep early. Eviction incoming.

10:28PM
@channel the following people have been found negligent (ghost members, inactive, excuse generators) by their teams and are going to the evicted from the workspace.
If your name is here, you can make your case, however, we already have a strong position about you, try your best.

AUG 3(2:04PM)
Hello @channel, how is your project going? If you have any major complaints that have not been addressed, please use this thread. Thank you.

Unfortunately, we will do some more deactivations after announcing the presentation score tomorrow. Please note that deactivations are not in any way aimed at demoralising anyone. We aim to help you, push you and help you move beyond your comfort zone. If you get deactivated, it is not that you are not good enough or that you cannot be much better - it just means you didn't make it at this time. @channel

Deactivation after the first presentation has become necessary because we realised that some groups did not put in the expected amount of work. We don't want you JUST to submit and progress; we genuinely want you to understand what you are doing. And we want to be able to say incredible things about everyone that completes this training. Therefore, we must keep the bar very high, and standards must be maintained. @channel You'll get more information on the teams getting deactivated tomorrow.

9:53 PM

@channel For the presentation grading, we had some parameters. These parameters were used for all teams and by all supervisors. Grading was done by multiple supervisors, and the aggregate is your final score. This means each team was graded by multiple people, and then the final score was collated (average), which is your final score.

Here are the parameters that we used:

Low Fi Design. (1)
2. High Fi Design: (1)
3. Moodboard and other design components (research documents too): (2)
4. Data schema: 2 (1 if they have anything less than three tables, 2 if they have anything more than three tables, 0 - if they have no schema).
5. Documentation: 1
6. Video: 1 (if the presenter used a video and the video is clear)
7. Audio: 1 (if the presenter uses audio and the audio is clear)
8. Github Repo: 2 (1-if they have a Github repo, 2 if the git repo has a readme.md content).
9. Project Explanation: 3 (Do you think the presenter adequately explained the project? 0 - means terrible explanation, nothing comes across clearly - 3 - means perfect explanation, it's very clear)
10. For extra creativity: 1 (This belongs to the grader, the grader can award freely)

Total obtainable points is 15

So far, some teams got 15/15 (still under review), however, the lowest point so far is 4.5 (still under review). The final point review is happening now, and the results will be announced tomorrow.

There is no cut-off mark; teams are not being evicted based on cut-off mark. Although most evicted teams (teams to be evicted) got low marks, eviction is not solely based on the low mark.

There are also those who attempted to cheat the system. Those teams will be automatically deactivated, hence, why eviction is not solely based on low grade.

We are clarifying this now to avoid comments like "my team got a good score, yet we were deactivated", of course, we'll tell you why you are being deactivated, and you'll get a chance to make your case.

10:40PM

The results will be announced at 9 AM (WAT) tomorrow. Because there are so many teams, we'll only be announcing 20 results here, the top 10 and 10 teams with the lowest score. The other teams will have to check your result on the scoresheet, which will be released tomorrow too. @channel

10:47PM
Finally, you'll also be getting general feedback from all supervisors tomorrow at 9:30 am. The feedback was done in an audio recording, Some of the things discussed might apply to you, and some might not. As much as possible, apply the feedback to your project and other areas. You'll also be getting more specific feedback from your project supervisors. You can leverage your meeting with them to ask for feedback. @channel

AUGUST 4TH(10:13AM)
@channel Apologies for the delay, here is the announcement:

Our top 10 teams are:

starting from number 10 to 1
10. Team 92: 14.55 points

9. Team 77: 14.75 points

9. Team 23: 14.75 points

9. Team 3: 14.75 points

6. Team 7: 14.9 points

The following teams all share the top position @channel

Teams 22, 24, 26, 64, 97: 15 points - first position

https://i4gxzuriprojectphase.slack.com/files/U03MXHM1R46/F03RWAQ3RE3/screenshot _2022-08-04_at_10.19.39_am.png

On the other hand, the following teams got the least amount of points:

There are 129 teams in the workspace. 7 teams have been evicted.

at position: 122, Team 117 points 4.35

at position: 121, Team 54 points 5.75

at position: 120, Team 47 points: 6.55

at position: 199, Team 67 points: 6.7

at position: 198, Team 19 points: 7

at position: 198, Team 16 points: 7

at position: 197, Team 119 points: 7.1

at position: 196, Team 70 points: 7.15

at position: 195, Team 104 points: 7.45

at position: 194, Team 2 points: 7.5

To avoid confusion, here is the scoresheet:
https://i4gxzuriprojectphase.slack.com/files/U03MXHM1R46/F03S80A837X/screenshot_2022-08-04_at_10.26.55_am.png

Please standby and await further announcements

10:38PM
@channel please check your calendar.. There's a backend python class scheduled for 11 today... See you soon🙂🙂

10:45PM
@channel here is the final scoresheet for all teams:
There will be more announcements after the python class:

11:12PM
@channel, there will no longer be eviction at this stage. However, please note the following about the next few days:

AUGUST 5TH(6:09AM)
1.You will be required to submit your completed design by Sunday for review.

2. You will be having some devOps class in the next few days

3. You'll be getting access to the server

4. Final presentation and submission will start on August 8

5. For the final presentation, some teams will present live, while others will send in their presentation by uploaded video

6. Teams that present live will get much higher points than those that present by upload

7. Teams to present live will be selected based on completion rate i.e. how far you have gone with your project

8:49PM

@channel You can listen to the mentor feedback here: https://youtu.be/5AG5GDOUDfo

(Give it some time to finish processing)

9:32PM

@channel Good evening, You are required to submit your Project's Final Design before 8:00 PM (WAT) SUNDAY 7th of August, 2022. You are submitting just your design link.
Note: Make sure that your link is accessible, do not submit a private link.
Click here to submit.https://forms.gle/fDiqofYQ1iopivoP6
Remember that the deadline is 8:00 pm on Sunday.

AUGUST 6TH(6:09AM)
1.You will be required to submit your completed design by Sunday for review.
2. You will be having some devOps class in the next few days
3. You'll be getting access to the server
4. Final presentation and submission will start on August 8
5. For the final presentation, some teams will present live, while others will send in their presentation by uploaded video
6. Teams that present live will get much higher points than those that present by upload
7. Teams to present live will be selected based on completion rate i.e. how far you have gone with your project

8:49AM

@channel You can listen to the mentor feedback here: https://youtu.be/5AG5GDOUDfo
(Give it some time to finish processing)

9:32AM

@channel Good evening, You are required to submit your Project's Final Design before 8:00 PM (WAT) SUNDAY 7th of August, 2022. You are submitting just your design link.
Note: Make sure that your link is accessible, do not submit a private link.
Click here to submit.https://forms.gle/fDiqofYQ1iopivoP6

Remember that the deadline is 8:00 pm on Sunday.

10:34PM

@channel Some of you think you can send insulting messages to Mentors anonymously and get away with it, note that we have Zero tolerance against disrespecting a mentor. I am going to get to the root of this, I will find you out and decisive action will be taken against you.

AUGUST 6TH(6:47AM)
@channel xyluz will be sharing the server login details with you and showing you how to set up your team project on the server. Ensure you attend the class on Sunday. The details can be found on the calendar.

8:35AM
@channel, there will be a round of individual deactivations today. Those who have not been contributing to the project on GitHub.

8:40AM
The above applies to everyone. As a designer, you should have some interaction with your Project on GitHub. @channel

3:45PM
@channel for this submissionhttps://i4gxzuriprojectphase.slack.com/archives/C03N4445HBM/p1659731556570529
 We recommend you duplicate your design and submit one, then keep working on the other (if there is more work to be done). If we see edits during the review, the assumption is that you are not done, and your team will be classified as such. You can still do that now.

4:29PM
As hint, to avoid any surprises on the second presentation: @channel
1.This is not a good idea. It's not organised, and you should not have so many things on the same page. Create a page for hi-fi, another for lo-fi etc. And your hi-fi should always be the first thing I land on when I visit your link.
https://i4gxzuriprojectphase.slack.com/files/U03MXHM1R46/F03S70M0MT9/screenshot_2022-08-06_at_4.28.48_pm.png

The same thing applies - please keep in mind that some people grading your work are not designers; they don't know how to use Figma. Therefore, make the work easier for them by separating pages.
https://i4gxzuriprojectphase.slack.com/files/U03MXHM1R46/F03SMHM18TU/screenshot_2022-08-06_at_4.31.20_pm.png

Although, this team has Hi-fi as the first page and separated, which is a good thing.

2. Please learn to resolve comments. When something is done, resolve it - again, some of the people reviewing your work are not designers, resolving comments make it obvious that you are done - unresolved comments only makes it appear like you are not done.

This is in the right direction, but Hi-Fi should come first.
https://i4gxzuriprojectphase.slack.com/files/U03MXHM1R46/F03SEV2K9U6/screenshot_2022-08-06_at_4.34.34_pm.png

3. Don't forget to label your pages. And arrange in proper order. For example, this is already going in the right direction.

Group mobile pages in one place, and desktop pages in another group

This is happening a lot. Please arrange your pages correctly.
https://i4gxzuriprojectphase.slack.com/files/U03MXHM1R46/F03TB99BU64/screenshot_2022-08-06_at_4.38.50_pm.png

Please try to resolve this question: The difference between wireframes and lo-fi. Many teams have the same thing in their lo-fi and wireframes sections. This is not a big deal for us (we are not going to grade this), but you might want to learn the difference. @channel

4:49PM
@channel, if you cannot create more than three pages for your team, I understand why you decided to group. Arrange, group and label properly to make things easier for the grader.

9:38PM
you can create multiple pages if you move the file to draft and not in team project

AUGUST 7TH(7:51PM)
@channel, this is closing in the next 9 mins.

8:11PM
@channel, design submission is now closed, remember that submission for the final project starts tomorrow. Also for the teams that have two submissions for the design submission, i am coming for you

10:03PM
@channel, the following teams had double submissions Teams 16, 5, 21,67, 128.

10:32PM
While Team 30 didn't submit

@channel

@channel for every team that decided to ignore the example of how to write your team name (Team_33) and you went ahead to add your own prefix and suffix, you will be deducted 1 point, double submission 2 points. it is time you start knowing that ignoring rules will cost you

10:43PM
@channel take note of this, you can no longer make edits to your designs, if your last edit is showing anything beyond 8:00 pm, you will get Zero points.

@channel for this submission:https://i4gxzuriprojectphase.slack.com/archives/C03N4445HBM/p1659731556570529 We recommend you duplicate your design and submit one, then keep working on the other (if there is more work to be done). If we see edits during the review, the assumption is that you are not done, and your team will be classified as such. You can still do that now.

8TH AUGUST(10:41AM)
Team 30, your team lead has not provided any reasons for the lack of submission. @channel the team will be deactivated by 2PM if we do not get a reply from your team lead.

12:53PM
@channel good morning to you. Welcome to the last dance of this training. Please follow the next set of announcements carefully and follow the instructions.

You are required to individually fill this formhttps://forms.gle/kJxJ9kW3PQmeJG5N7 as accurately as possible. Follow the form's example when filling it and provide the necessary information.
Section 1
a. Your Full Name: Coordinator
b. Your Track in the Project Phase: coordinator
c. Your Student ID: I4G583048ZYH (make sure your student is absolutely correct)
D. Your Team: Team_11110
Section 2
a. GitHub Link(s) (this should contain everything you have ever worked on during this project phase, the task you were assigned, the issues you resolved, the solutions you came up with, etc)

note: make sure that the links you are submitting are publicly accessible.
The deadline for submission is 6:00 pm Wednesday 10th of August, 2022.
Fill out the form here
https://forms.gle/kJxJ9kW3PQmeJG5N7

1:43PM
@channel for the GitHub link you can do this.
Each team member (or admin) should create a file in your team's Github repo. In the file, list your works with corresponding links. This helps if you had multiple tasks. This way you can just submit one Github link. If you don't have multiple submission it should work for you also.
copied @Osiki Victor

1:48PM
How will you say your track is full time @everyone your track is full-stack not full time

4:20PM
@channel so these are the things that you should take note of for your final presentation submission.
1.Every team is required to submit a video. Your video must follow the following guidelines
 Your video must be a minimum of 8 minutes maximum of 10 minutes.
 Every active member of a team must be on the video.
 Every active member of a team must introduce themselves on the call stating just their name and their track.
1.Your Presentation should have the following checked:
 Your video this time will require your presenter(s) to give us a work-through of your live project.
 Your presenters should focus on showing us the solutions you came up with, the features we asked for in your projects, your creativity in the project, your challenges, etc.
1.Your video must have clear and no noisy audio
3. Make sure your video is interactive.
 3.Get your links ready (GitHub, Documentation, Live project link, figma, etc)

9:08PM
@channel I am always surprised by you people. why would you submit this?
https://i4gxzuriprojectphase.slack.com/files/U03MXHH4L14/F03T6UM9NAV/slack_input.png

some of you, the only thing you have contributed during the project phase is to add padding to a button 12days ago, how na how?

@here

9:17PM

@everyone I think most of you did not realize that you are supposed to use the project phase to develop yourselves not to stay in the shadows and think you can make it through the phase without doing any tangible work. Now the project phase is about to end and all you have done is change the name on a document or create a database schema like you spent 2 months in the training phase just to add auto layout? 🙄

10:59AM
@channel Kindly fill this Post Program Survey.https://forms.gle/SMgZAyrjkoVRqTBAA
This will help us to get holistic feedback and we would know the areas we are to improve on for the next cohort and even for future training.
https://forms.gle/SMgZAyrjkoVRqTBAA

11:44AM
@everyone do not fill the survey form on the training phase workspace. Fill the one in this workspace only
